Global Economic Prospects, June 2025 World Bank, 2025-06-10 The global economy is facing another substantial headwind emanating largely from an increase in trade tensions and heightened global policy uncertainty For emerging market and developing economies EMDEs the ability to boost job creation and reduce extreme poverty has declined Key downside risks include a further escalation of trade barriers and continued policy uncertainty These challenges are exacerbated by subdued foreign direct investment into EMDEs Global cooperation is needed to restore a more stable international trade environment and scale up support for vulnerable countries grappling with conflict debt burdens and climate change Domestic policy action is also critical to contain inflation risks and strengthen fiscal resilience To accelerate job creation and long term growth structural reforms must focus on raising institutional quality attracting private investment and strengthening human capital and labor markets Countries in fragile and conflict situations face daunting development challenges that will require tailored domestic policy reforms and well coordinated multilateral support **Land-based**

investment and green development in Indonesia Anne Casson, Yohanes I Ketut Deddy Muliastira, Krystof Obidzinski, 2015-04-10 Growing global concern about the environmental costs of economic development resulting from natural resource extraction has sparked interest in a new economic paradigm known as green development Indonesia is currently experimenting with the green development paradigm and trying to define its meaning and better understand its potential applications So far this process has meant a refinement and realignment of existing policy measures that seek to reduce deforestation and GHG emissions These regulations often face contradictory economic development strategies

Revenues in Capital-Scarce Economies Christine J. Richmond, Irene Yackovlev, Ms. Susan S. Yang, 2013-06-12 Natural resource revenues are an increasingly important financing source for public investment in many developing economies Investing volatile resource revenues however may subject an economy to macroeconomic instability This paper applies to Angola the fiscal framework developed in Berg et al forthcoming that incorporates investment inefficiency and absorptive capacity constraints often encountered in developing countries The sustainable investing approach which combines a stable

fiscal regime with external savings can convert resource wealth to development gains while maintaining economic stability Stochastic simulations demonstrate how the framework can be used to inform allocations between capital spending and external savings when facing uncertain oil revenues An overly aggressive investment scaling up path could result in insufficient fiscal buffers when faced with negative oil price shocks Consequently investment progress can be interrupted driving up the capital depreciation rate undermining economic stability and lowering the growth benefits of public investment
