Scurfield, Katherine Theresa Platoni, 2013 *Healing War Trauma* details a broad range of exciting approaches for healing from the trauma of war The techniques described in each chapter are designed to complement and supplement cognitive behavioral treatment protocols

and ultimately to help clinicians transcend the limits of those protocols For those veterans who do not respond productively to or who have simply little interest in office based regimented and symptom focused treatments the innovative approaches laid out in *Healing War Trauma* will inspire and inform both clinicians and veterans as they chart new paths to healing

Re-Authoring Life Narratives After Trauma: A Holistic Narrative Model of Care Charles B. Manda, 2019-12-12 Re authoring Life Narratives after Trauma is an interdisciplinary specialist resource for traumatic stress researchers practitioners and frontline workers who focus their research and work on communities from diverse religious backgrounds that are confronted with trauma death illness and other existential crises This book aims to argue that the biopsychosocial approach is limited in scope when it comes to reaching a holistic model of assessing and treating individuals and communities that are exposed to trauma The holistic model must integrate an understanding of and respect for the many forms of religion and spirituality that clients might have Pargament 2011 It will not only bring a spiritual perspective into the psychotherapeutic dialogue but it will also assist in dealing with the different demands in pastoral ministry as related to clinical and post traumatic settings The book makes several contributions to scholarship in the disciplines of although not limited to traumatic stress studies pastoral care and counselling psychology and psychiatry Firstly the book brings spirituality into the psychotherapeutic dialogue traditionally religious and spiritual topics have not been a welcome part of the psychotherapeutic dialogue Secondly it underscores the significance of documenting literary narratives as a means of healing trauma writing about our traumas enables us to express things that cannot be conveyed in words and to bring to light what has been suppressed and imagine new possibilities of living meaningfully in a changed world Thirdly it proposes an extension to the five stage model of trauma and recovery coined by Judith Herman *The First Responder Healing Manual* Chris Adsit, Rahnella Adsit, 2014-12-20 Every day first responders immerse themselves in the chaos and confusion of other people's very bad days Eventually it takes a toll How do you handle it Suck it up and drive on right But which is best to stuff it employ temporary coping mechanisms and self medicate in harmful ways or to experience actual healing and resilience from God your Creator and Healer This interactive manual combines best practices from the medical and mental health communities with the timeless principles from the Bible that have addressed the effects of stress and trauma for centuries In this manual you will find step by step principles that will help you Understand how the stress and trauma you experience in the line of duty affects you physically psychologically and spiritually Become intentional about creating a healing environment for yourself and your family Adopt therapeutic spiritual disciplines Process your loss and grief Experience the freeing influence of giving and receiving forgiveness from God and from others Rebuild your identity based on what God says about you Strengthen yourself spiritually against future stress and trauma Connect with those who will support you in positive ways Learn how to deal with Secondary Traumatic Stress Burnout and Compassion Fatigue Understand how to help your family as they respond to your stress and trauma Make plans for the future as a strengthened man or woman of God

While this manual is best employed in a small group environment where group members form a cohesive unit to encourage each other along it can be used solo by a motivated individual who is serious about processing their stress and trauma and moving on to strength stability and resilience for the future
