How To Develop - Emotional Intelligence Alan Revolti,2019-09-03 Over the last decade the idea of emotional intelligence or EQ has become more popular throughout the world Unfortunately not many people understand what EQ the term is really about or why it has become so popular over the last several years Many scientific studies have been conducted over the years and have discovered that emotional intelligence is more important in life than the average intelligence that is measured by the IQ scale These studies which have been conducted by both American and European universities have proven that the common intelligence responses account for less than 20 percent of our achievements and successes in life while the other 80 percent depends solely on our emotional intelligence Everyone from students to CEOs is confronted by not only their own emotions but the emotions of everyone around them How you manage these emotions has a significant impact on how other people perceive us as well as our effectiveness to get things done When you can increase your emotional intelligence you can become better equipped to respond to stressful situations around you with a high degree of maturity John Mayer Peter Salovey and Konstantin Vasily Peterides are renowned researchers that discovered people who have high emotional intelligence tend to become better leaders and are excellent in everything they set out to accomplish The first person to use the term emotional intelligence was Wayne Payne in his doctoral thesis A Study of Emotion Developing Emotional Intelligence In his thesis he compared the IQ and emotional intelligence and determined that EQ was superior because it covers a wide range of faculties and aspects of a person s behavior Studying your emotional intelligence will help you to understand the source and impact of your emotions better This is important because it helps to enhance one s self awareness Studying your EQ will also provide you with the opportunity to understand better the behavior of others and the underlying reasons why they act the way they do Emotionally intelligent people can harmoniously reconcile what their mind and reason tell them with the voice of their feelings and emotions Thanks to this skill emotionally smart people are self confident self aware creative and energetic They are also much more capable of handling stress and knowing how to get along with others They are more optimistically approaching their life and don t fear change They are the people of success

Emotional Intelligence Jessica Greiner,2018-06-30 Would you be interested in a skill that helps you know what other people are thinking and feeling even if they aren t really sure of it themselves The fact is that the people who tend to be the most

successful in life aren't those who are the strongest or the smartest. But they are the ones who can use their natural charisma to manipulate interpersonal relationships while at the same time reliably keeping their emotions in check so they are free to make the most profitable choices in any given situation. The secret to these people's success is what is known as emotional intelligence, and if you haven't heard of it yet, rest assured that is going to change sooner than later as it is one of the most prized traits that many employers are looking for in their employees these days. Emotional Intelligence: The Complete Psychologist's Guide to Mastering Social Skills (A Step-by-step Guide for Beginners to Increase EQ Skills) Daniel Templeton, 2021-11-03. You might picture someone who never lets his temper get out of control no matter what problems he's facing. Or you might think of someone who has the complete trust of her staff, listens to her team, is easy to talk to, and always makes careful, informed decisions. These are qualities of someone with a high degree of emotional intelligence. You discover the happiness you seek with chapters covering: How to start thinking positively; Managing emotions and anxiety; Improving confidence to help you deal with everyday challenges; Developing positive relationships; How to influence people around you; Verbal and non-verbal ways of communicating; Being kind to yourself first; Celebrating small victories in life. The modern world is becoming more and more fast-paced, thereby sapping and draining. And the resultant demand to keep up makes it difficult to avoid automatic body and brain responses like overthinking and stress. It's also more difficult to keep our brains on top gear to handle problems efficiently, and as a result, we often find ourselves performing less and less than our ability and have a hard time maintaining healthy relationships.
