not tapped into an area that its competitors already dominate is the voice assist speaker system market. Reports have shown that Spotify is looking to add voice assist capabilities to its platform and is in turn considering the development of a proprietary smart speaker device. By 2017 the voice assist speaker market had become a global phenomenon valued at USD 4.4 billion and is projected to reach USD 23.3 billion by 2025. Spotify has been focused on maintaining its lead in music streaming but now smart speaker manufacturing companies will be able to disintermediate Spotify as a non-essential application, breaking its connection to customers. But with the current success of Spotify's music streaming platform and its competitors focused on the smart speaker segment that Spotify has no control over, Spotify must decide whether or not to follow the first movers and enter the voice assist speaker market.
