Digital Literacies for Learning Allan Martin, Dan Madigan, 2006. In the 21st century digital tools enable information to be generated faster and in greater profusion than ever before to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged and new literacies including information literacy and IT literacy need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate. Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky provides the foreword. The book is in two parts. In Part 1, *Literacies in the Digital Age*, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment. In Part 2, *Enabling and Supporting Digital Literacies*, the contributors go on to consider the ways in which digital literacies can be made available to learners and how these literacies are being relocated in a more student-centred environment within the broader perspective of learning. *Readership:* This book takes the issues raised in the successful *Information and IT Literacy* also co-edited by Allan Martin into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age.

Adoption and impact of OER in the Global South Cheryl Hodgkinson-Williams, Brazil Arinto, 2017-12-29. Education in the Global South faces several key interrelated challenges for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include unequal access to education, variable quality of educational resources, teaching and student performance, and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice and research in

developing countries

Reflections on Postgraduate Supervision and Academic Development in an African

Distance Education Environment Tennyson Mgtushini,Thenjiwe Meyiwa,Amile Mavundla,2024-03-05 Within postgraduate studies student non completion attrition and failure rates range from 29% to 65% These unacceptably high failure rates have been attributed to wide ranging influences Even so there is consensus that postgraduate supervision represents a critical enabling vehicle for student success Reflections on postgraduate supervision and academic development in an African distance education environment offers a collection of scholarly contributions that focus on critical questions related to the practice of postgraduate supervision from the multiple perspectives of higher education institutions postgraduate students and supervisors The inclusion of contributions from educators and learners in one manuscript makes this a unique text one that should be the mainstay of any scholar engaged in postgraduate studies The manuscript aptly makes the case for recognising that postgraduate preparation and supervision are the most critical contributing factors to the success of postgraduate learners and by inference they represent a significant panacea to many of Africa s social and economic skills

Digital Literacy Paul Gilster, 1997-03-10 Digital Literacy isn't a book about how to get around the Internet That ground has been amply covered Digital Literacy provides Internet novices with the basic thinking skills and core competencies they'll need to thrive in an interactive environment so fundamentally different from passive media such as television or print

Technological Evolution and Societal Shifts Michael Fascia, 2024-07-11 Scientific Study from the year 2024 in the subject Education Educational Tests Measurements grade 1 Edinburgh Napier University language English abstract The rapidly evolving technological landscape has had a profound impact on virtually every aspect of our lives and education is no exception In Technological Evolution and Societal Shifts Dr Michael Fascia presents a comprehensive examination of how modern technology can transform educational systems addressing both the potential benefits and the myriad challenges associated with integrating technology into learning environments This work is particularly timely given the recent global shifts prompted by the COVID 19 pandemic The sudden transition to remote learning has underscored the essential role of technology in education and highlighted the pressing need for educational systems to adapt to an increasingly digital world The traditional model of education with its standardized and often rigid approaches is proving inadequate for preparing students for the complexities of the 21st century Dr Fascia's

research provides a detailed exploration of how educational paradigms can evolve to better meet the needs of today's students through the thoughtful integration of technology. Dr. Fascia emphasizes the importance of personalized learning environments made possible by advanced digital tools and adaptive software. These technologies enable educators to tailor learning experiences to individual student needs, thereby enhancing engagement and improving educational outcomes. The book explores various case studies, including Finland's innovative use of artificial intelligence in classrooms and Singapore's Smart Learning Spaces, to illustrate practical applications of technology that have led to significant improvements in student learning. However, the integration of technology in education is not without its challenges. Dr. Fascia addresses the critical issue of the digital divide, which exacerbates existing inequalities by limiting access to digital devices and reliable internet connectivity for underprivileged and rural communities. He advocates for policies that ensure equitable access to technology, comprehensive teacher training, and robust data privacy measures to protect student information. These measures are essential for creating an inclusive educational environment where all students can benefit from technological advancements. Moreover, this book provides a framework for integrating technology into education, emphasizing the need for a strategic and coordinated approach.

Integrating Digital Literacy in the Disciplines Lauren Hays, Jenna Kammer, 2023-07-03 Digital literacy has become the vital competency that students need to master before graduating. This book provides rich examples of how to integrate it in disciplinary courses. While many institutions are developing introductory courses to impart universal literacy skills, students need to know and creative literacy skills for creating new content, discipline-specific skills. Skills needed to succeed within a specific discipline are a vital extension to their learning and ability to apply digital literacy in different contexts. This book provides examples of how to integrate digital literacy across a wide variety of courses spanning many domains. Rather than a wholly new core institutional outcome, digital literacy adds to the development of critical thinking, communication, problem-solving, and teamwork skills by building students' capacities to assess online information so they can ethically share, communicate, or repurpose it through the appropriate use of available digital technologies. In short, it provides the vital digital dimension to their learning and the literacy skills which will be in increasing demand in their future lives. Following introductory chapters providing context and a theoretical framework, the contributing authors from different disciplines share the digital competencies and skills needed within their fields, the strategies they use to teach them, and insights about the choices they made. What shines through the examples is that, regardless of the specificity of the disciplinary examples, they offer all readers a commonality of approach and a trove of ideas that can be adapted to other contexts. This book constitutes a practical introduction for faculty interested in including

opportunities to apply digital literacy to discipline specific content The book will benefit faculty developers and instructional designers who work with disciplinary faculty to integrate digital literacy The book underscores the importance of preparing students at the course level to create and be assessed on digital content as fields are modernizing and delivery formats of assignments are evolving Domains covered include digital literacy in teacher education writing musicology indigenous literary studies communications journalism business information technology strategic management chemistry biology health sciences optometry school librarianship and law The book demonstrates a range of approaches that can be used to teach digital literacy skills in the classroom including Progressing from digital literacy to digital fluency Increasing digital literacy by creating digital content Assessment of digital literacy Identifying ethical considerations with digital literacy Sharing digital content outside of the classroom Identifying misinformation in digital communications Digitizing instructional practices like lab notes and essays Reframing digital literacy from assumption to opportunity Preparing students to teach digital literacy to others Collaborating with other departments on campus to support digital literacy instruction Incorporating media into digital literacy digital media literacy Using digital storytelling and infographics to teach content knowledge Weaving digital literacy throughout the curriculum of a program and with increasing depth Digital Literacy Unpacked Katharine Reedy, Jo Parker, 2018-05-01 Digital Literacy Unpacked not only offers a snapshot of innovative approaches to digital literacy but also intends to provoke discussion encourage collaboration and inspire whatever the role or context *Personalized Reading* Michele Haiken, L. Robert Furman, 2018 Due to the diversity of readers in today's classrooms teachers are called upon to teach not reading but readers Personalized Reading highlights four different types of readers the struggling reader the reluctant reader English learners and advanced readers and presents ways to use technology tools to accommodate their different reading styles With this book teachers will develop the skills they need to help students select their own texts conduct reading workshops and teach students to read both print and visual texts while identifying what works best for each student to maximize learning and potential The strategies and classroom ready ideas presented here will help educators incorporate technology to promote reading critical thinking and digital literacy and will answer questions like How can teachers meet the needs of all learners to help them think critically and communicate effectively How can teachers approach reading of visual print and digital text This book will help teachers empower students with the skills and strategies they need for reading success and to find joy in reading inspire teachers to think beyond the text to help meet students where they are and raise the level of thinking about teaching readers and provide activities and lessons to help support the diverse learners that enter the classroom highlighting a variety of technology tools to tap into the multifaceted texts students can access
