

TEN STEPS TO MINDFULNESS MEDITATION

Create time & space.

Choose a regular time each day for mindfulness meditation practice, ideally a quiet place free from distraction.

Set a timer.

Start with just 5 minutes and ease your way up to 15-40 minutes.

Find a comfortable sitting position.

Sit cross-legged on the floor, on the grass, or in a chair your feet flat on the ground.

Check your posture.

Sit up straight, hands in a comfortable position. Keep neck long, chin tilted slightly downward, tongue resting on roof of mouth. Relax shoulders. Close eyes or gaze downward 5-10 feet in front of you.

Take deep breaths.

Deep breathing helps settle the body and establish your presence in the space.

Direct attention to your breath.

Focus on a part of the body where the breath feels prominent: nostrils; back of throat; or diaphragm. Try not to switch focus.

Maintain attention to your breath.

As you inhale and exhale, focus on the breath. If attention wanders, return to the breath. Let go of thoughts, feelings or distractions.

Repeat steps 6-7.

For the duration of meditation session. The mind will wander. Simply acknowledge this and return to your breath.

Be kind to yourself.

Don't be upset if focus occasionally drifts or if you fall asleep. If very tired, meditate with eyes open and rearrange posture to more erect (but still relaxed) position.

Prepare for a soft landing.

When the timer goes off, keep eyes closed until you're ready to open them. Be thankful. Acknowledge your practice with gratitude.

Mindfulness Meditation 2026 Guide

Beth Warren, MS, RDN, CDN

Mindfulness Meditation 2026 Guide:

Handbook of Obesity Treatment Thomas A. Wadden, George A. Bray, 2019-11-07 Description The leading clinical reference work in the field now significantly revised with 85% new material this handbook has given thousands of practitioners and students a comprehensive understanding of the causes consequences and management of adult and childhood obesity In concise extensively referenced chapters from preeminent authorities the Handbook presents foundational knowledge and reviews the state of the science of evidence based psychosocial and lifestyle interventions as well as pharmacological and surgical treatments It provides guidelines for conducting psychosocial and medical assessments and for developing individualized treatment plans The effects of obesity and of weight loss on physical and psychological well being are reviewed as are strategies for helping patients maintain their weight loss Key Words obesity medicine obese overweight weight loss weight management reduction eating disorders binge eating disorder night eating syndrome behavioral therapy behavioural therapies psychosocial treatments medical treatments bariatric surgery nonsurgical pharmacological adults children childhood adolescents assessments lifestyle interventions prevention psychological treatments evidence based treatment programs obesity epidemic Albert J Stunkard severe weight problems chronic weight problems body mass index health psychology clinical psychology behavioral medicine weight loss devices gastric balloons gastric bypass sleeve gastrectomy public health problems medical complications health consequences dietary options weight loss diets bingeing exercise physical activity addictions leptin
