Digital Literacy: Preparing Students for a Tech-Savvy World Ahmed Musa, 2024-12-26 Digital literacy is an essential skill for students to thrive in the modern world

This book explores how to teach students the critical skills they need to navigate the digital landscape from online research and cybersecurity to digital communication and content creation. With a focus on practical applications, this book provides educators with strategies for incorporating digital literacy into the curriculum. Whether you're a teacher, parent, or student, this book is your guide to understanding and mastering the digital world. *Digital Literacies for Learning* Allan Martin, Dan Madigan, 2006

In the 21st century, digital tools enable information to be generated faster and in greater profusion than ever before, to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools, and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians, and IT strategists to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged, and new literacies including information literacy and IT literacy need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico, and throughout Europe contribute to the debate. Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky, provides the foreword. The book is in two parts. In Part 1, *Literacies in the Digital Age*, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment. In Part 2, *Enabling and Supporting Digital Literacies*, the contributors go on to consider the ways in which digital literacies can be made available to learners and how these literacies are being relocated in a more student-centred environment within the broader perspective of learning. Readership: This book takes the issues raised in the successful *Information and IT Literacy*, also co-edited by Allan Martin, into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age. *Immersive Journalism* Tomás Dodds, 2024-04-17

This volume explores the rise of immersive technologies such as virtual reality, augmented reality, and 360 videos in the newsroom and how they affect newsmaking for journalists, news sources, and audiences. As these technologies offer journalists new and exciting opportunities to connect more deeply emotionally and presently with their audience, they also introduce unique ethical and practical questions concerning the collection and use of biometric, sensory, and metadata. Contributors analyze this shift from passive consumption to active engagement in order to investigate the positive and negative impacts that immersive technologies can have on journalistic norms, professional ethics, audience engagement, and data protection. Ultimately, this volume highlights both the potential for these technologies to

redefine the relationship between news producers and consumers and the potential challenges their integration may pose. Scholars of journalism, communication science, technology studies, and digital media will find this book particularly useful.
