Entering The Child's Mind The Clinical Interview In Psychological Research And Practice:

Entering the Child's Mind Herbert Ginsburg, 1997-11-28 *Entering the Child's Mind* teaches a powerful technique for gaining insight into a child's way of thinking. In the tradition of Piaget and Vygotsky, Dr. Herbert P. Ginsburg argues that standardized instruments of evaluation often fail to meet the challenges of complex cognition. Understanding that interviews like any evaluative instrument can be improperly conducted and assessed, Dr. Ginsburg then seeks to advance the critical analysis of the interview methods and to investigate its effectiveness and reliability. He presents guidelines intended to help novices learn to conduct clinical interviews and to assist more experienced interviewers in perfecting their techniques. Dr. Ginsburg provides to both psychologists and others interested in understanding the minds of children the first comprehensive treatment of the theory and practice of the clinical interview method from back cover

Building Support for Scholarly Practices in Mathematics Methods Signe E. Kastberg, Andrew M. Tyminski, Alyson E. Lischka, Wendy B. Sanchez, 2017-09-01 *Building Support for Scholarly Practices in Mathematics Methods* is the product of collaborations among over 40 mathematics teacher educators (MTEs) who teach mathematics methods courses for prospective PreK-12 teachers in many different institutional contexts and structures. Each chapter unpacks ways in which MTEs use theoretical perspectives to inform their construction of goals, activities designed to address those goals, facilitation of activities, and ways in which MTEs make sense of experiences prospective teachers have as a result. The book is organized in seven sections that highlight how the theoretical perspective of the instructor impacts scholarly inquiry and practice. The final section provides insight as we look backward to reflect and forward with excitement, moving with the strength of the variation we found in our stories and the feeling of solidarity that results in our understandings of purposes for and insight into teaching mathematics methods. This book can serve as a resource for MTEs as they discuss and construct scholarly practices and as they undertake scholarly inquiry as a means to systematically examine their practice.

Handbook of Reflection and Reflective Inquiry Nona Lyons, 2010-04-07 Philosophers have warned of the perils of a life spent without reflection, but what constitutes reflective inquiry and why it's necessary in our lives can be an elusive concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the *Handbook of Reflection and Reflective Inquiry* presents reflective thought in its most vital aspects, not as a fanciful or nostalgic exercise but as a powerful means of seeing familiar events anew, encouraging critical thinking and crucial insight, teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss reflective inquiry as a form of active attention. Thoreau's wide awakeness, an act of consciousness and a process by which people can understand themselves, their work, particularly in the form of life projects and others. Building on this foundation, the *Handbook* analyzes through the work of 40 internationally oriented authors definitional issues concerning reflection: what it is and is not, worldwide social and moral

conditions contributing to the growing interest in reflective inquiry in professional education Reflection as promoted across professional educational domains including K 12 education teacher education occupational therapy and the law Methods of facilitating and scaffolding reflective engagement Current pedagogical and research practices in reflection Approaches to assessing reflective inquiry Educators across the professions as well as adult educators counselors and psychologists and curriculum developers concerned with adult learning will find the Handbook of Reflection and Reflective Inquiry an invaluable teaching tool for challenging times

Jacobs,Luz Stella Lopez,1998 More than just a guide to assessing understanding of mathematics through flexible interviewing this book is filled with the wonderful ideas of children as they build their understanding The authors thoughtfully present what happens and can happen in classrooms where teachers ask the right questions at the right time enabling students to make connections and construct new understanding *Qualitative Research for Allied Health Professionals* Linda Finlay,Claire Ballinger,2006-03-31 This practical text addresses a gap in the literature by mapping the links between philosophy research method and practice in an accessible readable way It offers guidance to allied health professionals increasingly involved in research as the emphasis grows on evidence based practice on how to engage in meaningful good quality qualitative research To help researchers take on this challenge the book highlights some of the choices involved in carrying out qualitative research offers a wide range of practical examples to show how different ways of doing qualitative research can be managed critically examines a variety of qualitative research methodologies of particular interest to allied health professionals clarifies the links between epistemology methodology and method The book is structured in three parts Part I sensitises readers to the complex issues which challenge qualitative researchers at the planning stage of their projects In Part II the challenge of using different methodologies is critically explored by fifteen authors who describe their individual research experiences Part III examines the choices researchers make when they evaluate and present research Science and Science Teaching Sharon Sherman,Sharon J. Sherman,2000 This core text for K 8 science methods courses helps novice teachers become confident and competent in inquiry centered standards based

classrooms Science content and pedagogy are blended using a carefully crafted developmental approach in which teachers begin by learning basic ideas and practicing simple instructional strategies Once these are mastered teachers move on to learn and teach advanced concepts and complex experiments Students learn how to deliver inquiry based instruction create standards based lesson plans link instruction and assessment design performance assessments use a variety of teaching strategies and integrate science across the curriculum

When Teachers are Informed by Research on Children's Thinking Carolyn Joan O'Mahony, 2001 **For the Learning of Mathematics**, 2007 **Knowledge Under Construction** Daniel Ness, Stephen J. Farenga, 2007-03-29 Knowledge under Construction is the first to examine young children's spatial and scientific thinking through their architectural constructions with Legos™ and blocks The authors coding system allows teachers and parents to observe and record children's cognitive behaviors r Relationships Between Generalizing and Justifying Amy B Ellis, 2004 This dissertation explicates the nature of the relationships between students acts of generalizing and acts of justifying A new generalization framework supports the development of these relationships This cohesive categorization system differentiates the types of generalizations students construct when reasoning mathematically The framework accounts for multiple levels of generalizing and distinguishes between statements of generalization and the generalizing actions that lead to those statements The framework in concert with Harel and Sowder's 1998 taxonomy of proof schemes generated direct links between types of generalizations and associated proof schemes as well as more complex relationships revealing how the two acts mutually influence one another Research examining students ability to generalize and justify suggests that students experience severe difficulty in creating and using appropriate generalizations and proofs A review of the rich body of literature documenting students errors highlights the need to examine more thoroughly what students do understand to be general and convincing This study extends Lobato's 2003 actor oriented transfer perspective to examine the ways in which middle school students generalized during units on linear functions Qualitative analysis of clinical interviews and teaching experiment data focused on identifying and categorizing students generalizations proof schemes and the relationships between acts of generalizing and justifying Results include six hypotheses of direct links between particular categories of generalizations and particular proof schemes The study also identifies five dimensions across which students generalizations and justifications mutually interact to support increasingly sophisticated reasoning a cycles of generalizing actions and generalization products b the role of students attention focus c generalizations that promote the transformational proof scheme d the role of justification as explaining why and e generalizations supported by justifying via the transformational proof scheme The dimensions provide a way to account for the evolution of students generalizing and justifying Analysis of the data revealed that reasoning with emergent quantities constructed from ratios of two initial quantities is connected to more powerful generalizing and justifying than that seen when students reason with number patterns **Handbook of Clinical Interviewing With Children** Michel Hersen, Jay C.

Thomas, 2007-08-08 The Handbook of Clinical interviewing with Children presents a combination of theory and practice plus concern with diagnostic entities for readers who work or one day will work with children and their parents and teachers in clinical settings
