## **Environmental Economics A Very Short Introduction:**

**Environmental Economics: A Very Short Introduction** Stephen Smith, 2011-09-22 Environmental economics can be controversial but it is also central to some key policy issues facing governments and society today including industrial pollution global warming and waste recycling Stephen Smith looks at how economic activity affects the environment in which we live and how environmental policies can most effectively be used

**Sustainability** Saleem H. Ali, 2024-12-24 Very Short Introductions Brilliant Sharp Inspiring The growing concern about global environmental change and human impacts on the planet has led to the emergence of a broad field of study on the sustainability of human societies The term's common usage can be traced back to the advent of the Earth Summit in 1992 when sustainable development was broadly embraced by the international community as an ostensibly win win proposition for economic development social inclusion and ecological conservation Yet both the natural science underpinnings and the social implications of a quest for sustainability have been diffuse There is a need for a coherent synthesis which draws out key themes from both natural and social analysis of the concept This Very Short Introduction begins by introducing the concept of sustainability and how it has developed The central chapters consider four key concepts crucial to sustainability a material and energy flows in consumption and production b technological interventions for a sustainable society c tipping points and resilience in natural and social systems and d renewability and circularity in the economy In the concluding chapter Saleem H Ali explores political means of managing anthropogenic change for a more sustainable society

**ABOUT THE SERIES** The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

**Environmental Economics in Developing Countries** Achiransu Acharyya, 2022-11-02 The COVID 19 pandemic has laid bare the vulnerabilities of socio economic systems globally and exposed the risks that natural capital degradation imposes on human health economy and society This book studies the environmental challenges faced by developing economies in a post COVID 19 world Exploring diverse case studies from South Asia and Sub Saharan Africa the volume discusses the impact that economic development and recently COVID 19 has had on the environment ecology and economy of these regions It analyses nature conservation policies aimed at minimizing ecological damage arising from economic development and discusses the policy objectives of sustainable development It also highlights the significant role that environmental economics networks have played in

capacity building framing of policies using ecological economics tools and developing a local leadership trained in addressing local sustainability issues An important contribution to the study of environmental economics of the Global South the book will be of interest to students and researchers of economics environment development studies development economics environmental policies and South Asia studies It will also be useful for policymakers and NGOs working in this field

**Anarchism and Ecological Economics** Ove Daniel Jakobsen, 2018-12-07 Anarchism and Ecological Economics A Transformative Approach to a Sustainable Future explores the idea that anarchism aimed at creating a society where there is as much freedom in solidarity as possible may provide an ideal political basis for the goals of ecological economics It seems clear that it is going to be impossible to solve the problems connected to environmental degradation climate change economic crashes and increasing inequality within the existing paradigm The anarchist aims of reducing the disparities of rank and income in society and obtaining a high standard of living within environmentally sound ecosystems chime well with the ecological economists goal of living within our environmental limits for the betterment of the planet and society The book refers to the UN s sustainability development goals and the goals expressed in the Earth Charter viewing them through an anarchist s lens It argues that in order to establish ecological economics as a radical new economy right for the 21st century neoliberal economics needs to be replaced By connecting ecological economics to a solid philosophical tradition such as anarchism it will be easier for ecological economics to become a far more potent alternative to green economic thinking which is based on and supports the dominant political regime Innovative and challenging this book will appeal to students and scholars interested in economics and the politics surrounding it *Foundations of social ecological economics* Clive L Spash, 2024-03-05 This book explores radical dissent from orthodox mainstream economics and sets out a theoretically grounded vision for the emerging paradigm of social ecological economics At the heart of this paradigmatic shift lies an acknowledgement of the inextricable embeddedness of economies in biophysical reality and social structure The struggle for this transformative vision unfolds through a critical examination of mainstream environmental thought followed by a nuanced evaluation of contributions from Marxists socialists critical institutionalists feminists and Post Keynesians grappling with the urgent environmental crisis Synthesising insights from these diverse and heterodox schools the book navigates the philosophical underpinnings of science embracing a critical realist approach that challenges not only mainstream economic thought but also eclectic pluralism relativism and strong constructionism The question of what constitutes revolutionary science is explored in light of works by Kuhn Schumpeter and Neurath emphasising the pivotal role of values and ideology in works from Marx to Gramsci Building on these radical and philosophical foundations the book articulates a preanalytic vision of social ecological economics dismantling entrenched notions of growth and efficiency in favour of a framework centered on social provisioning and needs embedded in ethics In a thought provoking conclusion the book applies its analytical lens to the multiple crises of modernity within industrialised capital accumulating economies An agenda for social ecological

transformation toward diverse alternative economies emerges providing a compelling call to action in the face of contemporary challenges
