## **Environmental Politics In Japan Networks Of Power And Protest:**

*Environmental Politics in Japan* Jeffrey Broadbent, 1999-07-28 After World War Two Japan attained economic growth but suffered environmental disaster In response to massive protest in the 1960s and 1970s the Japanese government rapidly reduced the worst air and water pollution Jeffrey Broadbent's case study of industrial growth and pollution in a rural Japanese prefecture explains this response while testing political social movement and environmental theory The state conservative political party and big business pushed rampant growth until movements posed a political and disruptive challenge Then the elites passed some pollution control but also demobilized local protest quashed discontent and prevented the formation of national environmental groups Without the protest threat business stymied other government pollution control plans The interaction of material institutional and cultural factors especially informal institutions explained the dominance of actors and the pattern of outcomes Through this syncretic lens in a non Western setting this study refines our theories of the state protest movements political process and environmental problems

## **Social Movements and Political Activism in Contemporary Japan**

David Chiavacci, Julia Obinger, 2018-02-21 This book explores social movements and political activism in contemporary Japan arguing that the 2011 Fukushima nuclear accident marks a decisive moment which has led to an unprecedented resurgence in social and protest movements and inaugurated a new era of civic engagement Offering fresh perspectives on both older and more current forms of activism in Japan together with studies of specific movements that developed after Fukushima this volume tackles questions of emerging and persistent structural challenges that activists face in contemporary Japan With attention to the question of where the new sense of contention in Japan has emerged from and how the newly developing movements have been shaped by the neo conservative policies of the Japanese government the authors ask how the Japanese experience adds to our understanding of how social movements work and whether it might challenge prevailing theoretical frameworks

**Climate Action in a Globalizing World** Carl Cassegard, Linda Soneryd, Hakan Thorn, Asa Wettergren, 2017-05-18 The existence and urgency of global climate change is a matter of scientific consensus Yet the global politics of climate change have been anything but consensual In this context a wave of global climate activism has emerged in the last decade in response to the perceived failure of the political negotiations This book provides a unique comparative study of environmental movements in USA Japan Denmark and Sweden analyzing their interaction with the international climate institutions of the United Nations with national governments and with currents in the global climate movement It documents how and why the movement evolved between the Copenhagen Summit of 2009 and the Paris Summit of 2015 altering its strategies and tactics while attracting new actors to the issue area Further it demonstrates how the development of global environmental networks has increased contact between environmental movements in the Global North and those from the Global South resulting in the establishment of climate justice as a political cause and unifying frame for global climate activism
