Environmental Ethics Concepts Policy And Theory:

Environmental Ethics Joseph R. DesJardins, 1999 Publisher Description Environmental Ethics Joseph R. DesJardins, 2000 The text serves as an introduction to ethical theory as it applies to environmental issues and as a casebook on contemporary problems of science industry and individual decision making It provides a readable yet philosophically careful survey of the field of environmental ethics It is comprehensive covering topics from the relevance of Aristotle's ethics for environmental issues to Deep Ecology and Ecofeminism Environmental Ethics, 2004 **Handbook of Global Environmental Politics** Peter Dauvergne, 2012-01-01 The second edition of this Handbook contains more than 30 new and original articles as well six essential updates by leading scholars of global environmental politics This landmark book maps the latest theoretical and empirical research in this energetic and growing field Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics It makes a case for an expansive definition of the field one that embraces an interdisciplinary literature on the connections between global politics and environmental change The remaining chapters are divided into four broad themes states and cooperation global governance the political economy of governance and knowledge and ethics with each section covering key emerging issues In depth explorations are given to topics such as climate change multinational corporations international agreements and UN organizations regulations and business standards trade and international finance multilevel and transnational governance and ecological citizenship Handbook of Global Environmental Politics Second Edition is a comprehensive review of the field and offers cutting edge ideas for further research As such scholars students and policymakers will find themselves looking to it for many years to come Ethics and Environmental Policy Frederick Ferré, Peter Hartel, 1994 In this collection of essays leading environmentalists and philosophers explore the relationship between environmental ethics and policy both in theory and practice The first section of the book focuses on four approaches to change in ethical theory ecological science feminist metaphysics Chinese philosophy and holistic postmodern technology In subsequent sections the contributors emphasize the need for nontraditional solutions and attempt to expand awareness of the most pressing practical problems Among the topics discussed are the possibilities of real international cooperation the inequitable but economically intractable issue of global gasses the political and ethical challenges of city planning and the growing evidence of fundamental inappropriateness in treating land as legal private property This volume is based on essays presented in 1992 at the Second International Conference on Ethics and Environmental Policy The conference was held in response to the increasing need for a new ethics that would counter the traditional human centered dominantly individualistic approach of the industrial world toward the environment *Land, Value, Community* Wayne Ouderkirk, Jim Hill, 2012-02-01 Land Value Community provides an in depth critical study of the theories of J Baird Callicott one of the world's foremost environmental philosophers An international

group of scholars representing philosophy ecology ecofeminism Native American studies political science and religion studies critically assesses Callicott's contributions to environmental ethics and philosophy and presents alternative perspectives from their own work Each section consists of several authors focusing on one aspect of Callicott's thought raising questions not only for Callicott but also for anyone affected by environmental issues A noteworthy feature of the book is Callicott's own response to his critics This volume allows readers to explore multiple avenues in their search for answers to the significant philosophical questions raised by environmental problems

Business Ethics and the Natural Environment Lisa H. Newton, 2008-04-15 Business Ethics and the Natural Environment examines the present status of relations between corporate enterprise and the natural environment in the world today Discusses such questions as What obligations does a corporation have toward the environment To respect entities unprotected by law To care about future generations Argues that environmentally friendly business practices yield dividends exceeding expectations and that the competitive firm of the 21st century will follow green standards Provides a background in ethics a survey of business ethics an account of environmental philosophy an overview of environmental legal issues and an account of the problems associated with globalization

Ethical Water Stewardship Ingrid Leman Stefanovic, Zafar Adeel, 2020-10-20 This interdisciplinary book brings philosophers and non philosophers to the table to address questions of water ethics specifically in terms of how moral questions inform decision making around water security at local national and international scales Water security which pertains to the experience of assured access to clean water is a broad concept that intersects human rights politics economics law legislation public health trade agriculture and energy Decisions made at each of these intersection points have ramifications for human well being especially for the populations that are marginalized in a societal and political sense In this book the ethical dimensions of decision making at those intersection points are explored and real world examples are used to tease out some key insights It charts how ethical consideration can help shape a future in which everyone will be water secure

Technology and the Contested Meanings of Sustainability Aidan Davison, 2001-04-19 This transdisciplinary inquiry presents a new way of thinking about sustainability and technology that takes us beyond the familiar preoccupation with ecoefficiency and toward the contested moral question of what most nourishes our ability to care for our world In contrast to the technocratic aim of controlling a perilous future the author proposes that we develop the practical craft of sustenance Beginning with debates in environmental policy he draws upon recent philosophical interest in ecology technology and moral experience to argue that the challenge of sustainability is that of undermining those traditions that present technology as somehow external to our inherent moral ambiguity This discussion responds to the work of Langdon Winner Albert Borgmann Charles Taylor Martin Heidegger David Abram and others

Environmental Ethics and International Policy H. ten Have, 2006-01-01 This publication a joint initiative of the World Commission on the Ethics of Scientific Knowledge and Technology COMEST and the UNESCO Division of Ethics of Science and Technology contains

essays written by eight leading international experts in this relatively new inter disciplinary area of applied ethics These papers consider the moral dimensions of environmental management issues and explores proposals for effective international policy making to promote environmental objectives

The River of History Peter Farrugia,2005 The articles in this collection are dedicated to the proposition that human beings make history not just in the sense of being agents of change in the here and now but in the sense that we interpret appropriate and make use of the past for our own purposes in the future Covering topics that range from teaching history to the concept of property rights and the discipline of history in the television age these essays will radically alter the notion of how we make history It will show that we are never fully able to bend history to our will and that as we attempt to do so we are often shocked at the turns it takes despite our best efforts to shape it for future generations

The Environmental Ethics and Policy Book Donald VanDeVeer,Christine Pierce,1998 This text and sourcebook crosses disciplinary boundaries and attends seriously to economic reasoning and its implications for environmental policy issues while taking a broad view of questions of ethics It is appropriate and valuable not only for philosophy and environmental science students but also for students of economics biology engineering and public policy

Professional Ethics ,2003 A Case Study in Thomistic Environmental Ethics Robert L. Grant,2007 This original study applies the philosophical theological thought of Thomas Aquinas to issues of environmental ethics specifically in relation to the restoration and preservation of the plains of the Loess Hills in Iowa This study should appeal to scholars working in environmental ethics philosophy theology and ecology Thomas Aquinas Summa Theologiae to a particular environmental region namely the Loess Hills of Iowa The book begins by telling the ecological story of the Loess Hills and then proceeds to summarize the development of environmental ethics through the legacy of Henry David Thoreau thereby revealing certain tensions that exist in contemporary environmental debates Then after considering the strengths and weaknesses of anthropocentric and ecocentric ethical systems the author provides an exposition of Aquinas understanding of the bonum naturalis the bonum connaturalis and the bonum supernaturalis as these are found in the Summa Theologiae flourishing only in ways that simultaneously save the contextualizing ecosystems This ethic is then applied to the particular case of the Loess Hills producing an eudaimonistic ecoregionalism

Ciência & trópico ,2011 Environmental Ethics Louis P. Pojman,2001 Organized into two main parts the first on theory and the second on applications the third edition of this popular anthology provides the most comprehensive set of readings available for environmental ethics and includes topic areas not covered in other anthologies The text follows a dialogic pro con format to present different and conflicting views on each topic Articles have been carefully selected for clarity and accessibility

The Dhaka University Studies ,2005 **Environmental Ethics** Richard George Botzler,Susan Jean Armstrong,1998 This anthology edited by a professor of wild life science and a professor of philosophy offers the most current and comprehensive collection on the topic of environmental ethics available today It surveys diverse approaches to environmental ethics by leading writers from a variety of disciplines and provides an

historical survey of thought on our responsibility to the environment The perspectives are represented by their most articulate spokespersons and are accompanied by appraisals of their respective strengths and weaknesses Chapter introductions headnotes discussion questions and annotated bibliographies are provided Twenty eight of the 64 articles are new The new edition deletes those articles with which students had difficulty because they were hard to read and substitutes newer or better written articles All chapter introductions were revised to reflect changes in the field New topics include biodiversity ecological restoration environmental justice and genetic engineering A new section in the appendix on conflict resolution was requested by students *Encyclopedia of Biodiversity* Simon A. Levin, 2001 Includes articles on agriculture ecology forests wetlands and environment as well as organisms **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association, 1998 List of members in v 1
