**Evolution** Donald R. Prothero, 2007-11-22 Over the years paleontologists have made tremendous fossil discoveries which includes an amazing diversity of fossil humans suggesting we walked upright long before we acquired large brains This work tackles subjects ranging from flood geology and rock dating to neo Darwinism and macroevolution [The Debaters of This Age](#) Steven H Propp, 2019-02-05 It is June 2018 as an unusual group of scholars professors lecturers and students gather in a California hotel They are all attendees of an Apologetics conference intended to join qualified representatives of Christian Deist and Atheist thought for a two week no holds barred debate and discussion of their respective positions that will ultimately be included in a book published after the conference Evangelical Christianity is represented by advocates of Evidentialist and Presuppositionalist approaches to Apologetics Catholicism liberal Christianity and Deism are also well supported The Atheist perspective is advocated by a polemical author and a college professor notorious for attacking the views of his Christian students As the participants argue over controversial issues such as cosmology evolution The Bible historical evidence for Jesus the resurrection biblical prophecies and the problem of evil intellectual fireworks result But what will result when such a volatile and eclectic group is placed face to face for more than two weeks The Debaters of this Age is the tale of what happens inside a California hotel in 2018 when a group of intellectuals gather to vigorously discuss the religious issues of our time *Friend of Science, Friend of Faith* Gregg Davidson, 2019-11-19 A scientist explores the harmony between Christian faith and science Though some Christians and many skeptics see science and Christianity as locked in a never ending battle geologist Gregg Davidson contends that there is tremendous harmony between Scripture and modern science Many apparent conflicts arise when the Bible is interpreted apart from its literary and historical contexts but when these are taken into account most alleged clashes resolve Proceeding from a belief that Scripture is inspired and without error and that God's creation should inform how we interpret the Bible Davidson shows that Scripture and science need not disagree on issues like the age of the earth Adam and Eve Noah's flood the origin and development of life and numerous related topics Rather Christians can rejoice at how God's glory is revealed in both the Bible and the natural world

**Treatise on Ab-deism : A New Philosophy** Maurice Guy, 2025-10-08 *Treatise on Ab deism* A New Philosophy presents a new philosophy on religion specifically monotheism that rejects the concept of God not by simple rejection of a belief but by a demonstration of a total absence of a relationship with such a deity as this religious God and by demonstrating that religion has never known its god it has never had an authentic and authoritative legitimacy Ab Deism emphatically rejects the claims that religion knows its gods ab deism demonstrates that god's is either dead or has never communicated with religion and thus religion has never know Him them based upon the very claims it has made that this book will amply analyze and falsify Evolution Douglas J. The Story of Life in 25 Fossils Donald R. Prothero, 2015-08-25 Every fossil tells a story. Best-selling paleontology author Donald R. Prothero describes twenty-five famous beautifully preserved fossils in a gripping scientific history of life on Earth. Recounting the adventures behind the discovery of these objects and fully interpreting their significance within the larger fossil record, Prothero creates a riveting history of life on our planet. The twenty-five fossils portrayed in this book catch animals in their evolutionary splendor as they transition from one kind of organism to another. We witness extinct plants and animals of microscopic and immense size and thrilling diversity. We learn about fantastic land and sea creatures that have no match in nature today. Along the way we encounter such fascinating fossils as the earliest trilobite, *Olenellus*, the giant shark *Carcharocles*, the fish-like *Tiktaalik*, the frog-like *Ambystoma* and the Turtle on the Half Shell, enormous marine reptiles and the biggest dinosaurs known, the first bird, *Archaeopteryx*, the walking whale *Ambulocetus*, the gigantic hornless rhinoceros *Paraceratherium*, the largest land mammal that ever lived and the *Australopithecus* nicknamed Lucy, the oldest human skeleton. We meet the scientists and adventurers who pioneered paleontology and learn about the larger intellectual and social contexts in which their discoveries were made. Finally we find out where to see these splendid fossils in the world's great museums. Ideal for all who love prehistoric landscapes and delight in the history of science, this book makes a treasured addition to any bookshelf, stoking curiosity in the evolution of life on Earth. *Evolution* Duane T. Gish, 1973 This book constitutes one of the most devastating critiques of the evolutionary philosophy one could find. It goes right to the stronghold of the supposed scientific evidence for evolution and demolishes its central bastion. The fossil record must provide the critical evidence for or against evolution since no other scientific evidence can possibly throw light on the actual history of living things.
