**Evolutionary Algorithms** William M. Spears, 2000-06-15 Despite decades of work in evolutionary algorithms there remains an uncertainty as to the relative benefits and detriments of using recombination or mutation This book provides a characterization of the roles that recombination and mutation play in evolutionary algorithms It integrates important prior work and introduces new theoretical techniques for studying evolutionary algorithms Consequences of the theory are explored and a novel method for comparing search and optimization algorithms is introduced The focus allows the book to bridge multiple communities including evolutionary biologists and population geneticists *American Book Publishing Record*, 2000-07 **Particle swarm optimizer: Economic dispatch with valve point effect using various PSO techniques** Vikramarajan Jambulingam, 2014-05-01 Four modified versions of particle swarm optimizer PSO have been applied to the economic power dispatch with valve point effects In order to obtain the optimal solution traditional PSO search a new position around the current position The proposed strategies which explore the vicinity of particle s best position found so as far leads to a better result In addition to deal with the equality constraint of the economic dispatch problems a simple mechanism is also devised that the difference of the demanded load and total generating power is evenly shared among units except the one reaching its generating limit To show their capability the proposed algorithms are applied to thirteen Comparison among particle swarm optimization is given The results show that the proposed algorithms indeed produce more optimal solutions in both cases The different PSO techniques are New PSO Self Adaptive PSO and Chaotic PSO Among the different PSO techniques it is found that Self Adaptive PSO is better than other PSO techniques in terms of better solutions speed of convergence time of execution and robustness but it has more premature convergence *Natural Computing for Simulation and Knowledge Discovery* Nunes de Castro, Leandro, 2013-07-31 Nature has long provided the inspiration for a variety of scientific discoveries in engineering biomedicine and computing though only recently have these elements of nature been used directly in computational systems Natural Computing for Simulation and Knowledge Discovery investigates the latest developments in nature influenced technologies Within its pages readers will find an in depth analysis of such advances as cryptographic solutions based on cell division the creation and manipulation of biological computers and particle swarm optimization techniques Scientists practitioners and students in fields such as computing mathematics and molecular science will make use of this essential reference to explore current trends in natural computation and advance nature inspired technologies to the next generation [Advances in Evolutionary Computing](#) Ashish Ghosh, Shigeyoshi Tsutsui, 2002-11-26 This book provides a collection of fourty articles containing new material on both theoretical aspects of Evolutionary Computing EC and demonstrating the usefulness success of it for various kinds of large scale real world problems Around 23 articles deal with various theoretical aspects of EC and 17 articles demonstrate the success of EC methodologies These articles are written by leading experts of the field from different countries all over the world

Neural networks have great promise for improving AI capabilities and efficiency they analyze input through interconnected nodes to accomplish tasks like voice and picture recognition replicating the human brain      High Performance Architecture and Grid Computing Archana Mantri, Suman Nandi, Gaurav Kumar, Sandeep Kumar, 2011-07-05 This book constitutes the refereed proceedings of the International Conference on High Performance Architecture and Grid Computing HPAGC 2011 held in Chandigarh India in July 2011 The 87 revised full papers presented were carefully reviewed and selected from 240 submissions The papers are organized in topical sections on grid and cloud computing high performance architecture information management and network security      Introduction to Evolutionary Computing Agoston E. Eiben, J.E. Smith, 2013-03-14 Evolutionary Computing is the collective name for a range of problem solving techniques based on principles of biological evolution such as natural selection and genetic inheritance These techniques are being increasingly widely applied to a variety of problems ranging from practical applications in industry and commerce to leading edge scientific research This book presents the first complete overview of this exciting field aimed directly at lecturers and graduate and undergraduate students It is also meant for those who wish to apply evolutionary computing to a particular problem or within a given application area To this group the book is valuable because it presents EC as something to be used rather than just studied Last but not least this book contains quick reference information on the current state of the art in a wide range of related topics so it is of interest not just to evolutionary computing specialists but to researchers working in other fields      **Introduction to Evolutionary Computing** A.E. Eiben, J.E. Smith, 2015-07-01 The overall structure of this new edition is three tier Part I presents the basics Part II is concerned with methodological issues and Part III discusses advanced topics In the second edition the authors have reorganized the material to focus on problems how to represent them and then how to choose and design algorithms for different representations They also added a chapter on problems reflecting the overall book focus on problem solvers a chapter on parameter tuning which they combined with the parameter control and how to chapters into a methodological part and finally a chapter on evolutionary robotics with an outlook on possible exciting developments in this field The book is suitable for undergraduate and graduate courses in artificial intelligence and computational intelligence and for self study by practitioners and researchers engaged with all aspects of bioinspired design and optimization      **Artificial Intelligence Applications and Innovations** Lazaros Iliadis, Ilias Maglogiannis, Harris Papadopoulos, 2014-09-15 This book constitutes the refereed proceedings of the 10th IFIP WG 12.5 International Conference on Artificial Intelligence Applications and Innovations AIAI 2014 held in Rhodes Greece in September 2014 The 33 revised full papers and 29 short papers presented were carefully reviewed and selected from numerous submissions They are organized in the following topical sections learning ensemble learning social media and mobile applications of AI hybrid changing environments agent AGE classification pattern recognition genetic algorithms image and video processing feature extraction environmental AI simulations and fuzzy modeling and data mining forecasting      **Applied Biomedical**
