**Evolutionary Algorithms** William M. Spears,2013-03-09 Despite decades of work in evolutionary algorithms there remains a lot of uncertainty as to when it is beneficial or detrimental to use recombination or mutation This book provides a characterization of the roles that recombination and mutation play in evolutionary algorithms It integrates prior theoretical work and introduces new theoretical techniques for studying evolutionary algorithms An aggregation algorithm for Markov chains is introduced which is useful for studying not only evolutionary algorithms specifically but also complex systems in general Practical consequences of the theory are explored and a novel method for comparing search and optimization algorithms is introduced A focus on discrete rather than real valued representations allows the book to bridge multiple communities including evolutionary biologists and population geneticists Parameter Setting in Evolutionary Algorithms F.J. Lobo, Cláudio F. Lima, Zbigniew Michalewicz, 2007-04-03 One of the main difficulties of applying an evolutionary algorithm or as a matter of fact any heuristic method to a given problem is to decide on an appropriate set of parameter values Typically these are specified before the algorithm is run and include population size selection rate operator

probabilities not to mention the representation and the operators themselves This book gives the reader a solid perspective on the different approaches that have been proposed to automate control of these parameters as well as understanding their interactions. The book covers a broad area of evolutionary computation including genetic algorithms evolution strategies genetic programming estimation of distribution algorithms and also discusses the issues of specific parameters used in parallel implementations multi objective evolutionary algorithms and practical consideration for real world applications It is a recommended read for researchers and practitioners of evolutionary computation and heuristic methods Optimization in Dynamic Environments Jürgen Branke, 2012-12-06 Evolutionary Algorithms EAs have grown into a mature field of research in optimization and have proven to be effective and robust problem solvers for a broad range of static real world optimization problems Yet since they are based on the principles of natural evolution and since natural evolution is a dynamic process in a changing environment EAs are also well suited to dynamic optimization problems Evolutionary Optimization in Dynamic Environments is the first comprehensive work on the application of EAs to dynamic optimization problems It provides an extensive survey on research in the area and shows how EAs can be successfully used to continuously and efficiently adapt a solution to a changing environment find a good trade off between solution quality and adaptation cost find robust solutions whose quality is insensitive to changes in the environment find flexible solutions which are not only good but that can be easily adapted when necessary All four aspects are treated in this book providing a holistic view on the challenges and opportunities when applying EAs to dynamic optimization problems The comprehensive and up to date coverage of the subject together with details of latest original research makes Evolutionary Optimization in Dynamic Environments an invaluable resource for researchers and professionals who are dealing with dynamic and stochastic optimization problems and who are interested in applying local search heuristics such as evolutionary algorithms

Nature-Inspired Algorithms for Optimisation Raymond Chiong, 2009-05-02 Nature Inspired Algorithms have been gaining much popularity in recent years due to the fact that many real world optimisation problems have become increasingly large complex and dynamic The size and complexity of the problems nowadays require the development of methods and solutions whose efficiency is measured by their ability to find acceptable results within a reasonable amount of time rather than an ability to guarantee the optimal solution This volume Nature Inspired Algorithms for Optimisation is a collection of the latest state of the art algorithms and important studies for tackling various kinds of optimisation problems It comprises 18 chapters including two introductory chapters which address the fundamental issues that have made optimisation problems difficult to solve and explain the rationale for seeking inspiration from nature The contributions stand out through their novelty and clarity of the algorithmic descriptions and analyses and lead the way to interesting and varied new applications

Evolutionary Optimization: the  $\mu$ GP toolkit Ernesto Sanchez, Massimiliano Schillaci, Giovanni Squillero, 2011-04-01 This book describes an award winning evolutionary algorithm that outperformed experts and conventional heuristics in solving

several industrial problems It presents a discussion of the theoretical and practical aspects that enabled GP MicroGP to autonomously find the optimal solution of hard problems handling highly structured data such as full fledged assembly programs with functions and interrupt handlers For a practitioner GP is simply a versatile optimizer to tackle most problems with limited setup effort The book is valuable for all who require heuristic problem solving methodologies such as engineers dealing with verification and test of electronic circuits or researchers working in robotics and mobile communication Examples are provided to guide the reader through the process from problem definition to gathering results For an evolutionary computation researcher GP may be regarded as a platform where new operators and strategies can be easily tested MicroGP the toolkit is an active project hosted by Sourceforge http ugp3 sourceforge net Constraint-Handling in Evolutionary Optimization Efrén Mezura-Montes, 2009-04-07 This book is the result of a special session on constraint handling techniques used in evolutionary algorithms within the Congress on Evolutionary Computation CEC in 2007 It presents recent research in constraint handling in evolutionary optimization Evolutionary Optimization Ruhul Sarker, Masoud Mohammadian, Xin Yao, 2002-01-31 The use of evolutionary computation techniques has grown considerably over the past several years. Over this time the use and applications of these techniques have been further enhanced resulting in a set of computational intelligence also known as modern heuristics tools that are particularly adept for solving complex optimization problems Moreover they are characteristically more robust than traditional methods based on formal logics or mathematical programming for many real world OR MS problems Hence evolutionary computation techniques have dealt with complex optimization problems better than traditional optimization techniques although they can be applied to easy and simple problems where conventional techniques work well Clearly there is a need for a volume that both reviews state of the art evolutionary computation techniques and surveys the most recent developments in their use for solving complex OR MS problems This volume on Evolutionary Optimization seeks to fill this need Evolutionary Optimization is a volume of invited papers written by leading researchers in the field All papers were peer reviewed by at least two recognized reviewers The book covers the foundation as well as the practical side of evolutionary optimization **Evolutionary Computation for Dynamic Optimization Problems** Shengxiang Yang, Xin Yao, 2013-11-18 This book provides a compilation on the state of the art and recent advances of evolutionary computation for dynamic optimization problems The motivation for this book arises from the fact that many real world optimization problems and engineering systems are subject to dynamic environments where changes occur over time Key issues for addressing dynamic optimization problems in evolutionary computation including fundamentals algorithm design theoretical analysis and real world applications are presented Evolutionary Computation for Dynamic Optimization Problems is a valuable reference to scientists researchers professionals and students in the field of engineering and science particularly in the areas of computational intelligence nature and bio inspired computing and evolutionary computation Advances in Evolutionary Algorithms Chang Wook Ahn, 2006-03-02
